Mike Fitzgerald

VICE PRESIDENT, OPERATIONS

Mike Fitzgerald joined Pure Storage as Vice President of Operations in 2019. He is responsible for Pure's extensive global supply chain for three product families, 6,000 unique components, 30 top assemblies, and 3 contract manufacturers across 10 locations.

Mike was most recently at Lenovo where he served as VP of Operations for their Data Center Products Group. He was a key member of the transition team that acquired and integrated the System X Enterprise business from IBM into Lenovo.

Mike was also a core participant in helping drive Lenovo's ranking into Gartner's "Global Supply Chain Top 25." He also led Worldwide Manufacturing Strategy while at Lenovo, opening factories in multiple geographies that enabled a 5x increase in global unit output.

His prior experience at Lenovo includes VP of WW Quality for PCs and Data Center Products and global executive leadership positions in Supply Chain, New Products Introduction, and Manufacturing.

Mike held leadership positions at EMC within their supply chain, procurement, and manufacturing organizations, and worked at both Hughes Aircraft and Exide Electronics.

Mike holds a Bachelor of Science degree in Production and Operations Management from California Polytechnic University and an MBA from Duke's Fuqua School of Business.
